Quick Ten Quiz

Notes and answer key | 11 November 2026

What it is

A 10-question multiple-choice general knowledge quiz that runs in the browser. It covers science, geography, history and books. After each answer the quiz shows whether you were right, the correct answer and a one-line explanation. A results screen at the end shows your score and reviews every question.

Features

- 10 questions, 4 options each, shown one at a time with a progress bar.
- Instant feedback: the right answer turns green, a wrong pick turns red, and an explanation appears.
- Running score shown at the top of every question.
- Keyboard support: press 1 to 4 to answer, then Enter on the Next button to continue.
- Answer order is shuffled on every attempt, so the correct option moves around.
- Results screen with score out of 10, percentage, a short verdict and a question-by-question review.
- Best score is remembered in your browser between visits.
- Works on phone and desktop, in light and dark themes.

How scoring works

Each correct answer is worth 1 point, for a maximum of 10. There is no negative marking, and each question can be answered only once. The verdict on the results screen depends on the percentage:

Score	Verdict
10 / 10	Perfect score
8 to 9	Excellent
6 to 7	Solid result
4 to 5	A fair start
0 to 3	Tough round, try again

Answer key

#	Question	Answer	Why
1	Which planet in our solar system has the most confirmed moons?	**Saturn**	Saturn holds the record, with well over 200 confirmed moons, ahead of Jupiter.
2	What is the capital city of Australia?	**Canberra**	Canberra was purpose-built as the capital as a compromise between rivals Sydney and Melbourne.
3	Which chemical symbol stands for gold?	**Au**	Au comes from the Latin word aurum. Ag is silver.
4	Who wrote the novel Pride and Prejudice?	**Jane Austen**	Jane Austen published it in 1813.
5	Which is the largest ocean on Earth?	**Pacific Ocean**	The Pacific covers about a third of the planet's surface.
6	In which year did humans first land on the Moon?	**1969**	Apollo 11 landed in July 1969. Neil Armstrong and Buzz Aldrin walked on the surface.
7	Which is the hardest naturally occurring substance?	**Diamond**	Diamond rates 10 on the Mohs scale, the top of the scale.
8	Which river flows through the city of Cairo?	**The Nile**	Cairo sits on the Nile, just south of where the river fans out into its delta.
9	How many bones does a typical adult human body have?	**206**	Babies are born with about 300 softer bones, and many fuse together as they grow.
10	Roughly how fast does light travel in a vacuum?	**300,000 km per second**	Light moves at about 299,792 km per second, which rounds to 300,000.

Changing the quiz

To change the topic, difficulty or number of questions, or to add a timer, ask for the update and the published page can be revised in place.
